

Package ‘genutil’

June 19, 2024

Type Package

Title Assisting Prediction of Breeding Values

Version 1.0

Date 2024-06-19

Author person(given = ``Bjarke",
family = ``Poulsen",
role = c(``aut``, ``cre"),
email = ``bgp@qgg.au.dk",
comment = c(ORCID = ``0000-0002-3589-2008"))

Maintainer Bjarke Poulsen <bgp@qgg.au.dk>

Description The package has simple utility functions to assist prediction
of breeding values.

License GPL (>= 2)

Imports Rcpp (>= 1.0.12), dplyr, magrittr, orthopolynom, tidyverse

Depends tidyverse, magrittr, Matrix, data.table

LinkingTo Rcpp

Archs x64

Contents

genutil-package	1
rcpp_hello_world	2

Index	3
--------------	----------

genutil-package	<i>A short title line describing what the package does</i>
-----------------	--

Description

A more detailed description of what the package does. A length of about one to five lines is recommended.

Details

This section should provide a more detailed overview of how to use the package, including the most important functions.

Author(s)

Your Name, email optional.

Maintainer: Your Name <your@email.com>

References

This optional section can contain literature or other references for background information.

See Also

Optional links to other man pages

Examples

```
## Not run:  
## Optional simple examples of the most important functions  
## These can be in \dontrun{} and \donttest{} blocks.  
  
## End(Not run)
```

rcpp_hello_world

Simple function using Rcpp

Description

Simple function using Rcpp

Usage

```
rcpp_hello_world()
```

Examples

```
## Not run:  
rcpp_hello_world()  
  
## End(Not run)
```
